

Clouds

We have studied weather in science and the students enjoyed learning about clouds. Here are a few activities for you to do.

1. Read the Clouds book and talk about the different types of clouds.
2. Look at the cloud photographs and see what pictures you see in them.
3. Use the cloud cutouts to do some cloud math, add and subtract up to 15.
4. Try to make a cloud using the instructions enclosed.
5. Record the kind of clouds you see outside in the cloud journal.
