

Number Fun

- 1. Read the story, “Mission: Addition.” Solve the problems as you read. Talk about what you have learned about addition.**
- 2. Play a game of “Math War,” which is played just like the card game War, with the largest number winning all the cards.**
- 3. Solve some of the equations and word problems on the spiral “Equations” flip chart.**
- 4. Practice math facts with your child using the mini flash cards on the clip.**
- 5. Roll the flashing number cubes (they flash when you drop them). Use the numbers rolled to create a word problem to add to our word problem booklet.**
