

Polar Express Math

Name: _____

Use pictures, words, or numbers to explain how you determined your answer.

1. If there are two seats in every row of the train, and there are 10 rows, how many kids could sit on the train?

2. Each child got to enjoy one treat. On the train we had 5 different kinds of cookies and 3 different kinds of candies. How many choices were available?

3. How many more choices of cookies than candies?
